

BLUEPRINT AI STUDIO · DTC GROWTH PROPOSAL

AI-Powered Retail Growth for KeepOutFakeLove

Automate your customer retention, ad performance,
and brand growth — so every dollar you spend actually
moves the needle.

THE PROBLEM

Great product. But the growth engine is running on manual.

KOFL has the brand, the look, and the product. What's missing is the system behind the scenes that turns one-time buyers into lifetime customers — and turns ad spend into real revenue.

01 Stalled Growth & Brand Awareness

Organic reach is declining across platforms. Without a content engine or ad system that compounds, growth stays flat no matter how good the product is.

02 No Customer Retention System

Previous buyers go silent after their first purchase. No automated reminders, no re-engagement flows, no reason for them to come back unless they remember on their own.

03 Ad Spend Without Direction

Money goes into Meta Ads but there's no system to test creatives, kill losers, and scale winners automatically. Without that feedback loop, ad dollars get wasted.

THE SOLUTION

Four AI systems that turn customers into repeat buyers.

SYSTEM 01

AI Retention Engine

Automatically re-engage previous buyers with personalized SMS and email sequences tied to their purchase history — new drops, restocks, and exclusive early access.

- ✓ Post-purchase thank you + review request (48h after delivery)
- ✓ "We miss you" win-back flow (30/60/90 days inactive)
- ✓ VIP early access alerts for returning customers

SYSTEM 02

Smart Ad Manager

AI monitors your Meta ad campaigns in real-time and applies rules automatically — pause underperformers, scale winners, and rotate creatives before fatigue sets in.

- ✓ Auto-pause ads below your ROAS threshold
- ✓ Scale winning ad sets by 20% daily (capped)
- ✓ Daily performance summary texted to your phone

THE SOLUTION (CONTINUED)

SYSTEM 03

AI Content Engine

Generate ad copy, Instagram captions, and email subject lines at scale using AI trained on your brand voice. 10x your creative output without hiring a copywriter.

- ✓ Generate 20+ ad copy variations per drop
- ✓ Instagram captions matched to your brand tone
- ✓ A/B test hooks and angles automatically

SYSTEM 04

Customer Intelligence Dashboard

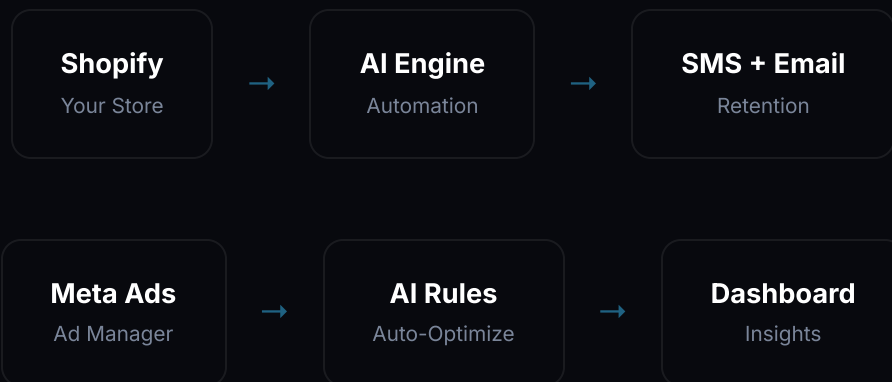

See your entire customer base in one view — who's buying, who's churning, what's trending, and where your revenue is actually coming from.

- ✓ Customer segments: VIP, at-risk, new, inactive
- ✓ Product performance and sell-through rates
- ✓ Weekly AI insights report delivered to your phone

HOW IT WORKS

We plug into your existing stack.

Your Shopify store and Meta Ads stay as-is. We connect our AI layer underneath — nothing changes on your end.

THE TRANSFORMATION

Before vs. After

WITHOUT BLUEPRINT AI

- ✗ One-time buyers vanish after first purchase
- ✗ No automated follow-ups or win-back flows
- ✗ Ad spend feels like guessing — no clear ROI
- ✗ Writing ad copy and captions manually
- ✗ No customer segmentation or insights

WITH BLUEPRINT AI

- ✓ Buyers get re-engaged automatically at 30/60/90 days
- ✓ Every customer gets the right message at the right time
- ✓ Ads auto-optimize — losers pause, winners scale
- ✓ 20+ copy variations generated per drop in seconds
- ✓ Full customer intelligence dashboard on your phone

INVESTMENT

Simple, transparent pricing.

TURN EVERY AD DOLLAR INTO MEASURABLE REVENUE

\$1,500

One-time setup & build

\$425/mo

Ongoing operations & support

Setup includes full architecture build, Shopify + Meta Ads integration, retention flow design, ad rule configuration, content engine setup, dashboard build, and end-to-end testing. Monthly covers infrastructure, SMS/email sending, AI compute, ad monitoring, and ongoing optimization.

NEXT STEP

Ready to turn customers into repeat buyers?

Book a 15-minute discovery call. We'll audit your current ad setup, map out your retention gaps, and show you exactly what we'd build.
