AI-Powered Operations for KeepOutFakeLove

Automate your orders, follow-ups, and buyer communications — so you can focus on the brand, not the busywork.

THE PROBLEM

You're spending hours on work a machine should handle.

Every drop cycle, the same manual grind repeats. These three bottlenecks are costing you time, money, and missed orders.

01 Manual Order Link Distribution

Every drop, you're sending ordering links to buyers one by one via email and text. It's slow, repetitive, and doesn't scale.

02 No Follow-Up System

After sending the list, there's no way to automatically know who ordered and who ghosted. Buyers slip through the cracks every cycle.

03 Manual Data Entry

Every order gets manually typed into spreadsheets. It's slow, error-prone, and eats hours that should go toward growing the brand.

THE SOLUTION

Three AI systems. Fully automated operations.

Each system solves one of your core bottlenecks. They work together, run 24/7, and require zero manual input.

SYSTEM 01

Auto-Send Order Links

When a new drop goes live on Brandboom, your entire buyer list gets the ordering link automatically — via SMS and email, personalized, in seconds.

- ✓ Triggered instantly by new Brandboom collections
- ✓ Personalized SMS + email to every buyer
- ✓ Buyers get the link in seconds, not hours

SYSTEM 02

Smart Follow-Up Sequences

AI tracks who ordered and who didn't, then automatically follows up at 24h, 48h, and 72h with the right message for each buyer.

- ✓ Automated 24h / 48h / 72h follow-up cadence
- ✓ Different messaging for buyers vs. no-shows
- ✓ Flags unresponsive buyers for your personal outreach

THE SOLUTION (CONTINUED)

SYSTEM 03

AI Order Dashboard

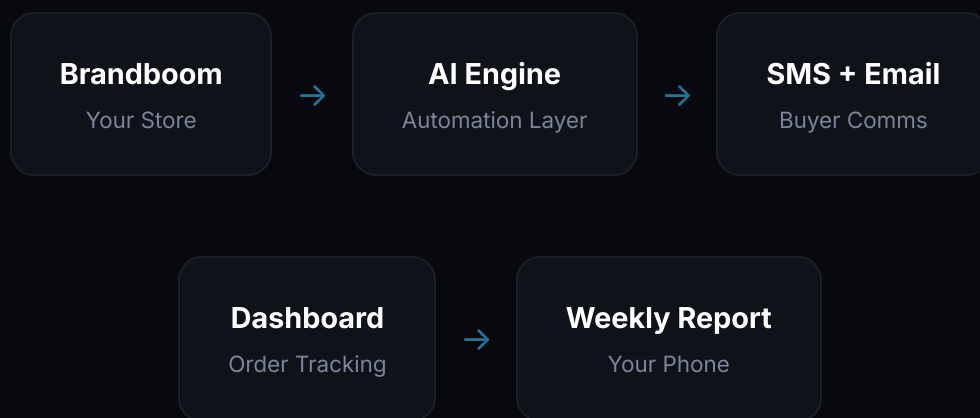

Every Brandboom order auto-populates into a clean, organized dashboard in real time. No manual input — ever.

- ✓ Real-time sync from Brandboom → live dashboard
- ✓ Buyer, items, payment status, shipping — all tracked
- ✓ Weekly AI summary report texted to your phone
